5. Completion monitoring.

User Stories For Release:

Sprint 1

1. [3]As a dev, I want secure login.
2. [5]As a product owner, I want to be able to create a product and view it
3. [6]As a dev, I want my changes to persist to the next login
4. [8]As a dev, I want to be able to view a scrum board page and a product backlog page

Sprint 2

1. [4]As a product owner, I want to be able to share a product.
2. [4]As a dev, I want to be able to create a user story
3. [4]As a dev, I want to be able to add tasks to a user story
4. [6]As a dev, I want to be able to move user stories from Product backlog to Sprint backlog

Sprint 3

1. [5]As a dev, I want User stories in sprint backlog to automatically populate the scrum board.
2. [4]As a dev, I want to be able to assign myself tasks
3. [2]As a dev, I want to be able see my own tasks color coded on the scrum board
4. [8]As a dev, I want to be able to drag a task into different columns on the scrum board.
5. [6]As a product owner, I want to be able to see completed user stories in the backlog and in the completed column on the board.
6. [4]As a product owner, I would like to see completed user story rows on the board at the bottom and incomplete user stories as top rows.
7. [2]As a dev, I want to be able to edit tasks.

Release Plan: **Agile Scrum Tracker**

User Stories For Release contin.
