Sprint 3 Report

Agile Scrum Tracker

Actions to stop doing:
- Stop creating database
- Spend the time upfront to prevent technical debt.
- Don't temporarily hard code data in place of database calls

Actions to start doing:
- Use static, unit, and integration testing
- Abstract out/wrap firebase function calls
- Use interfaces.
- Start using more helpful comments.
- Writing features on separate branches and doing PULL requests with code review.
- Write small single purpose functions that can be reused.
-

Actions to keep doing:
- Utilizing a component in more than one page
- Coordination of integrating pages that interact with shared components Ex. Tasks
- Using shared style across multiple components
- Add context so that loading happens in context not, in components
-

(for these two look at template SprintReportTemplate.pdf)

Work completed/not completed:
- The only task not completed was having tasks on the scrum board be colored based on who they are assigned to.

Work completion rate:
- 94% (48 out of 51 task points)

Burn-up
